Vue.js, Svelte, JavaScript, jQuery, Vuex, Laravel, PHP Core, Postman, Amazon, (AWS), Laravel Vapor, Inertia.js, Slack, Jira, GitHub, Zoom, AnyDesk, Skype

Software Developer

Tech Bridge Consultancy

Apr 2021 - Aug 2022 (1 year 5 months)

#Job Type: On-site

#Overview:

Employed as a pivotal member of a SaaS-based product company, Tech Bridge Consultancy, I contributed to the development of innovative solutions utilizing a diverse tech stack and collaborative tools.

#Tech Stack:

Laravel, Vue.js, jQuery, Vanilla JS, Core PHP, Vuex, Vue Masking, Prime Vue, Bootstrap Vue.

#Tech Tools:

VS Code, PhpStorm, Postman, Microsoft Teams, Mattermost, Slack, AnyDesk, Code With Me Guest, FileZilla, SQLyog, Remote SSH, Trello.

#Key-Responsibilities

- Writing code that's easy to understand, and works smoothly for each project's needs.
- Working closely with different teams, like designers and mobile developers (for iOS and Android), to smoothly add new features.

Also, make sure these teams can easily connect with the project by providing customized REST APIs.

- Fixing any problems with the code and finding ways to make it work even better for users.
- Staying updated on the latest web development trends and technologies and using them when it makes sense for the project.
- Testing the project to make sure it works right and meets all the requirements.
- Creating documents to explain how the project works for future reference.
- Following the best ways to keep the project secure, scalable, and easy to maintain.
- Learning new things to keep getting better at coding and helping the team succeed.
